

Other Health Care Services

- **Primary and Ambulatory Care**
- **Private Practitioners**
- **Certified Home Health Agencies**
- **Adult Care Facilities**

Factor 6: The Existence of Other Health Care Services in the Affected Region, Including the Availability of Services for the Uninsured and Underinsured

Primary and Ambulatory Care

The attached table lists diagnostic and treatment (D & T) centers by region¹. D & T centers are clinics that offer a range of primary and specialty services. A large portion of D & T centers are not-for-profit and located in underserved areas. Many meet the criteria for Federally Qualified Health Centers (FQHC's), and receive Federal funds in support of comprehensive primary care and 24/7 coverage to underserved, uninsured and Medicaid populations. D & T centers operated by hospitals are considered extension clinics of the hospital (list attached).

Private Practitioners

Physicians in private practice are a major health care resource. However, the private practice of medicine is not subject to DOH regulation, making the scope and volume of services delivered in a community difficult to measure. The best means of estimating the degree to which private practice physicians serve the underserved in a given area is through the analysis of Medicaid claims filed with DOH by physicians who participate in the Medicaid program.

Certified Home Health Agencies

Certified Home Health Agencies (CHHAs) provide part-time, intermittent health care and support services to individuals who need intermediate and skilled health care. CHHAs can also provide long-term nursing and home health aide services, can help patients determine the level of services they need, and can either provide or arrange for other services including physical, occupational, and speech therapy, medical supplies and equipment, and social worker and nutrition services.

Adult Care Facilities

Adult care facilities (ACFs) refers to a category of community-based facilities which provide temporary or long-term, non-medical residential care services to adults who are substantially unable to live independently. The types of adult care facilities are adult homes, enriched housing, and residences for adults. An assisted living program (ALP), which is available in some adult homes and enriched housing programs, combines residential and home care services.

¹ Facilities are listed by authorized operating entity, some of which are certified to operate additional facilities in areas outside the entity's home county and particular Commission region. This accounts for the occasional appearance of D&T centers and extension clinics whose location lies outside the parent facility's county or borough.
